

I opppose any change to current policy to increase the amount of radio/tv outlets that can be owned by one company/party. The FCC charges enormous fees for radio frequency licenses (I am not sure about TV) and actively suppresses "pirate" radio. Michael Powell can not, on one hand, support these huge fees which make entry into media markets cost-prohibitive for anything but large commercial operations and then, on the other hand, advocate some kind of free market solution to media diversity in the country. THIS IS A PLAIN AS DAY CORPORATE GIVE AWAY!
